Python & SQL: Pandas, NumPy, Scikit-learn, XGBoost, SQL Window Functions, SQLite
AI & Productivity: Claude Code, ChatGPT Work, OpenAI Codex, Microsoft Copilot, AI-Assisted Analysis, AI-Assisted Coding

Work Experience

Unicare Medical Centre Dubai, UAE
Financial Analyst (Remote) *May 2024 – Jan 2025*
- Achieved revenue forecasts within 5% by building Excel models using patient volume and payer-mix sensitivity.
- Reduced insurance receivable aging from 62 to 54 days across 4,000+ claims by developing an aging dashboard for payer follow-up.
- Reduced pharmacy-to-billing mismatches from AED 35K to under AED 3K by investigating duplicate invoices and implementing monthly reconciliation.
- Delivered 100% of month-end reports accurately and on schedule through weekly reviews and documented workflows.

Hallmark Lights & Equipment Kerala, India
Sales & Market Analysis Intern *Mar 2024 – Apr 2024*
- Drove a 12% increase in customer inquiries by analyzing competitor pricing, product demand, and market trends across lighting categories.
- Supported pricing and product decisions by analyzing weekly sales data in Excel using Pivot Tables and charts to identify performance trends.
- Supported a 15% increase in retailer orders by developing Excel reports with VLOOKUP and conditional formatting to track sales trends and pricing.

Finance & Accounting Intern *May 2023 – Jun 2023*
- Reduced supplier costs by 8% by analyzing monthly P&L statements with SUMIF and Pivot Tables to identify cost inefficiencies.
- Improved financial planning by developing quarterly budgeting and forecasting templates in Excel for expense tracking and management review.
- Resolved discrepancies across 50+ ledger entries by validating financial records with Excel cross-checks and data validation before month-end reporting.

Projects

Marketing Analytics & Retail Customer Intelligence | GitHub Python | Pandas | XGBoost | Plotly
- Analyzed 2.58M retail transactions using Python and Pandas across 2,500 households and 581 stores to evaluate customer, product, and marketing data.
- Identified $7,360.93 Champion customer value and 53.3% median Week-4 retention using RFM, K-Means, and cohort analysis.
- Identified 972 cross-sell rules using Apriori with MLxtend on 174,484 baskets for merchandising opportunities.
- Achieved 0.9751 R^2 and $50.25 MAE comparing Linear Regression, Random Forest, XGBoost across 13,936 records.

Enterprise Sales & Commercial Analytics Platform | GitHub SQL | Python | SQLite | Scikit-learn
- Built an 18-table Star Schema using SQL and SQLite with 13 indexes and 11 views for cross-functional KPI reporting.
- Analyzed 3 years of commercial data using SQL and Python, identifying 0.38x pipeline coverage and $312.5M exposure.
- Achieved 2.09% holdout MAPE using Holt-Winters forecasting to support sales and demand planning.
- Used Claude Code and OpenAI Codex to support Python development, SQL query iteration, debugging, and analytical workflow documentation.

Certifications

Google Project Management | Qlik Sense Business Analyst Qualification | Alteryx Designer Core | Google Data Analytics
